

# The spiritual wisdom of ancient India

The types of questions posed to The Vedic Foundation represent some of the common uncertainties among Hindus — especially Hindus educated and living in the West. It was to educate Hindus about authentic Hinduism that the Vedic Foundation was formed. In addition, it was to precisely address these types of questions logically, scientifically and scripturally that “*The True History and the Religion of India*” was written. Although the book is extremely concise it requires reading all 800 pages to fully understand the answers to these questions.

**There are many organizations and institutions working on the history of India in the East as well as the West. Why another organization, The Vedic Foundation?**

The Vedic Foundation is bringing forth the history of India as directly described in the Bhartiya scriptures. Having found inaccuracies in college and school text books and printed materials about the history and the religion of India, it was researched and discovered how this misinformation has been spread around the world (described in detail in “*The True History and the Religion of India*” Part I, Chapter 3). Many organizations follow these biased interpretations of western

writers. The Vedic Foundation’s educational programs focus on correcting this misinformation, clearing confusion and dispelling myths that many of us hold about our history and religion.

**Why does The Vedic Foundation want to provide an authentic form of Hinduism and to become a definitive resource for Hinduism in the West only and not in the East?**

Although The Vedic Foundation is working in the western countries, in India our institution Jagadguru Kripalu Parishat is vigorously establishing the greatness of Hinduism and showing the path to God through our many preachers. The Vedic Foundation is just one part of the entire mission.

**How can religious persons explain the history of India authentically without any scientific and universally accepted principles?**

“Science” as we understand it in the West is only a measurement and analysis of physical matter, thus incapable of measuring or documenting Divinity. Scientific discoveries

and knowledge that have been accumulated so far are continuously shifting and chang-

ing. Even as we speak, scientists are making new discoveries and continuously modifying, revisiting or abandoning cur-

rent theories of physical reality. The same is true for historians who base entire theories and timelines on very small and isolated findings. In contrast, our Vedic science details the origin of life and scientifically explains the twelve phases of creation, the functioning of the planetary system, the absolute age of the sun, the earth planet and much, much more. For detailed information, read Part II, Chapter 4 of “*The True History and the Religion of India.*”

**You claim that the Hindu religion was first revealed 155.52 trillion years ago. What about the age of the Sanskrit language?**

Sanskrit is the language of the Divine world. When the scriptures were revealed in this brahmand 155.52 trillion years ago Sanskrit language and its grammar were also revealed along with them. Sanskrit has been in its perfect form since the very beginning – it has not had a single ‘sound shift’ or a change in the vowel system or any addition in its

grammar or change in the formation of words. Its perfection is the every evidence that it was not man-made but a Divine gift. “The six unmatched features of the Sanskrit language” in “*The True History and the Religion of India*” describes this topic further.

**How would the Foundation tackle its assertion of Divine dimension when it has no acceptability among the historians in the East or in the West?**

Atheistic historians are always prone to damage Hinduism. In our scriptures we also have the provision for such people. They should try to be honest and pious in their behavior and open minded to accept a logical view and slowly start to begin to accept the Graciousness of God. That’s what the book is for to reveal the true authentic aspect of Hinduism for every soul of the world.

Our Foundation is presenting and supporting what was and has always been the greatness of India...”the spiritual wisdom of ancient India” which has since been diluted and obscured by the conquest of India by foreign rulers.
